

ASA
Export group **ASA**

Introduction

Iran is one of the countries in southwest of Asia (middle east) its bordered with Afghanistan and Pakistan in east, Turkmenistan in northeast, Caspian sea into north, Azerbaijan, Armenia and turkey in the northwest, also Iraq in the west and finally it is boarded to the south to Persian gulf and Oman sea. The Islamic republic of Iran due to its large population, political stability, potential economic resources and most important having the largest coast in Persian gulf and dominating the strategic strait of alas well as its access to central Asia and Caspian sea, acting as a bridge between Asia, Europe Africa is of great geopolitical importance and can take more steps to increase trading.

Therefore, with more than two thousand kilometers of coastline from the Arvand River to port of Goatre, in addition to dominating the waterways leading to the Indian Ocean, it's the only country that can transport between various exports by land to many parts of the world for its product. Keep in mind that Iran has been a member of free trade with Eurasia since october27, 2019, Eurasia is Iran's new partner. This is an important advantage for Iran because these countries are consumerist countries and Iran, as a producing country, can easily export its goods to these countries, central Asians, India, Pakistan and Afghanistan are also consumer countries and most importantly, like Iranian goods.

These two reasons are enough to consider Iran one of the main supplier of polyethylene pipes and joints at region scale.in the meantime, we can mention Iran's good and friendly relations with the CIS countries, which will cause economic prosperity in all countries.

Iran's convenient geographical location increases the speed of goods transfer and communication, and this speed and time saving in trade is very valuable. Iran is in the middle of the world. Compared to European countries, we can deliver goods in fastest time. Central Asian countries, we can deliver goods in fastest time. Central Asian countries can also easily receive our export goods. This is while a country like china does not have our position, but it has made excellent use of its existing capacities. Iran's first advantage in trade with the world is that it has a strategic position in the Middle East. Another very important advantage of Iran's exports compared to other countries is the very low cost of labor wages. This teaches us to work for the export of goods in which the wages of the worker (i.e. manpower) are very low.

The more effective this cost is on the cost of that product, that product has the more competitive advantage in the export market.

As it seems we can say all can put up especial count for buying and exporting polyethylene pipes and joints on Iran.

About Us

ASA Company, polyethylene pipes and joints, is cooperating with the great Arad holding company has started their work into inner country marketing and exporting, so it can improve their prosperity in all cities in great Iran and Persian Gulf area and also neighbor countries and worldwide markets.

customers service is one of our main business programs, based on that all our efforts are for customers satisfaction and good purchase experience for our dear customers.

- 

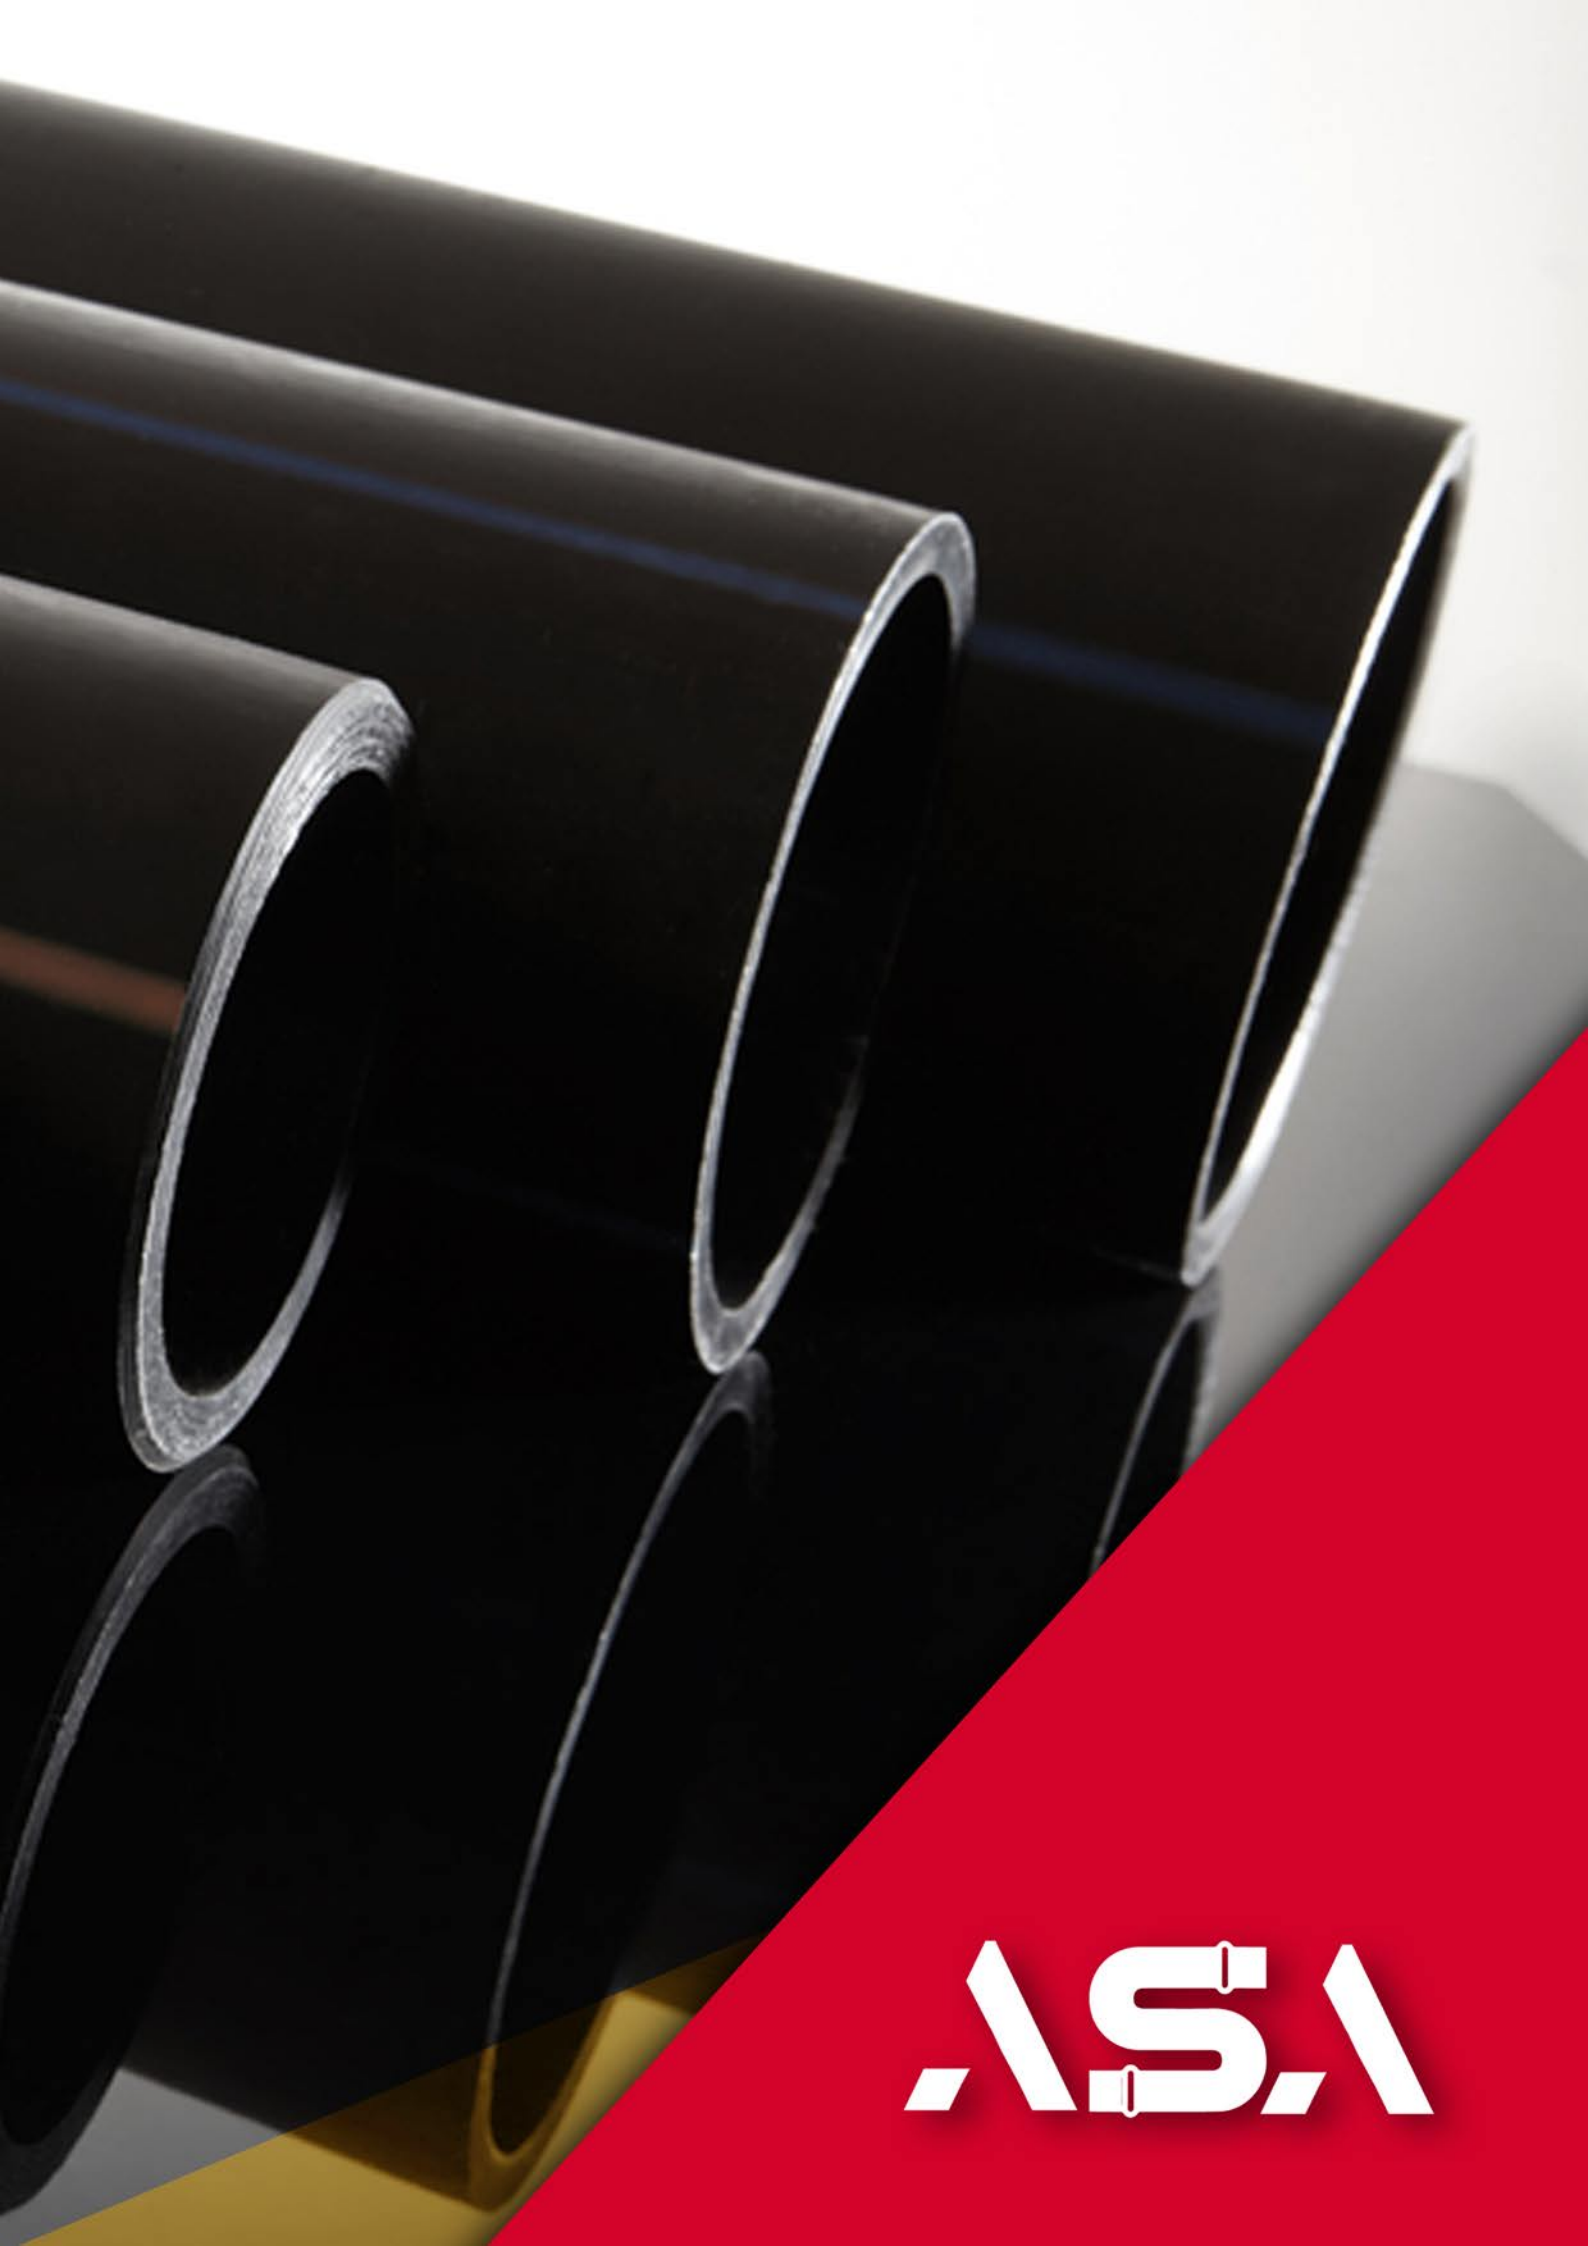

Our products

Polyethylene pipes and joints

Polyethylene pipes can be used for water and gas, and to extend their length they use welding.

If welding has been done correct, we will have a standard connectivity between two pipes. Polyethylene pipes should have high resistance against cracks caused by environment tension, because liquids can get dense under high pressure and act as an intense factor. Being Resistance against intense factors is important for product life service length even if there is no intense factor.

To calculate polyolefin resin resistance and pipes made of them, there are especial tests.

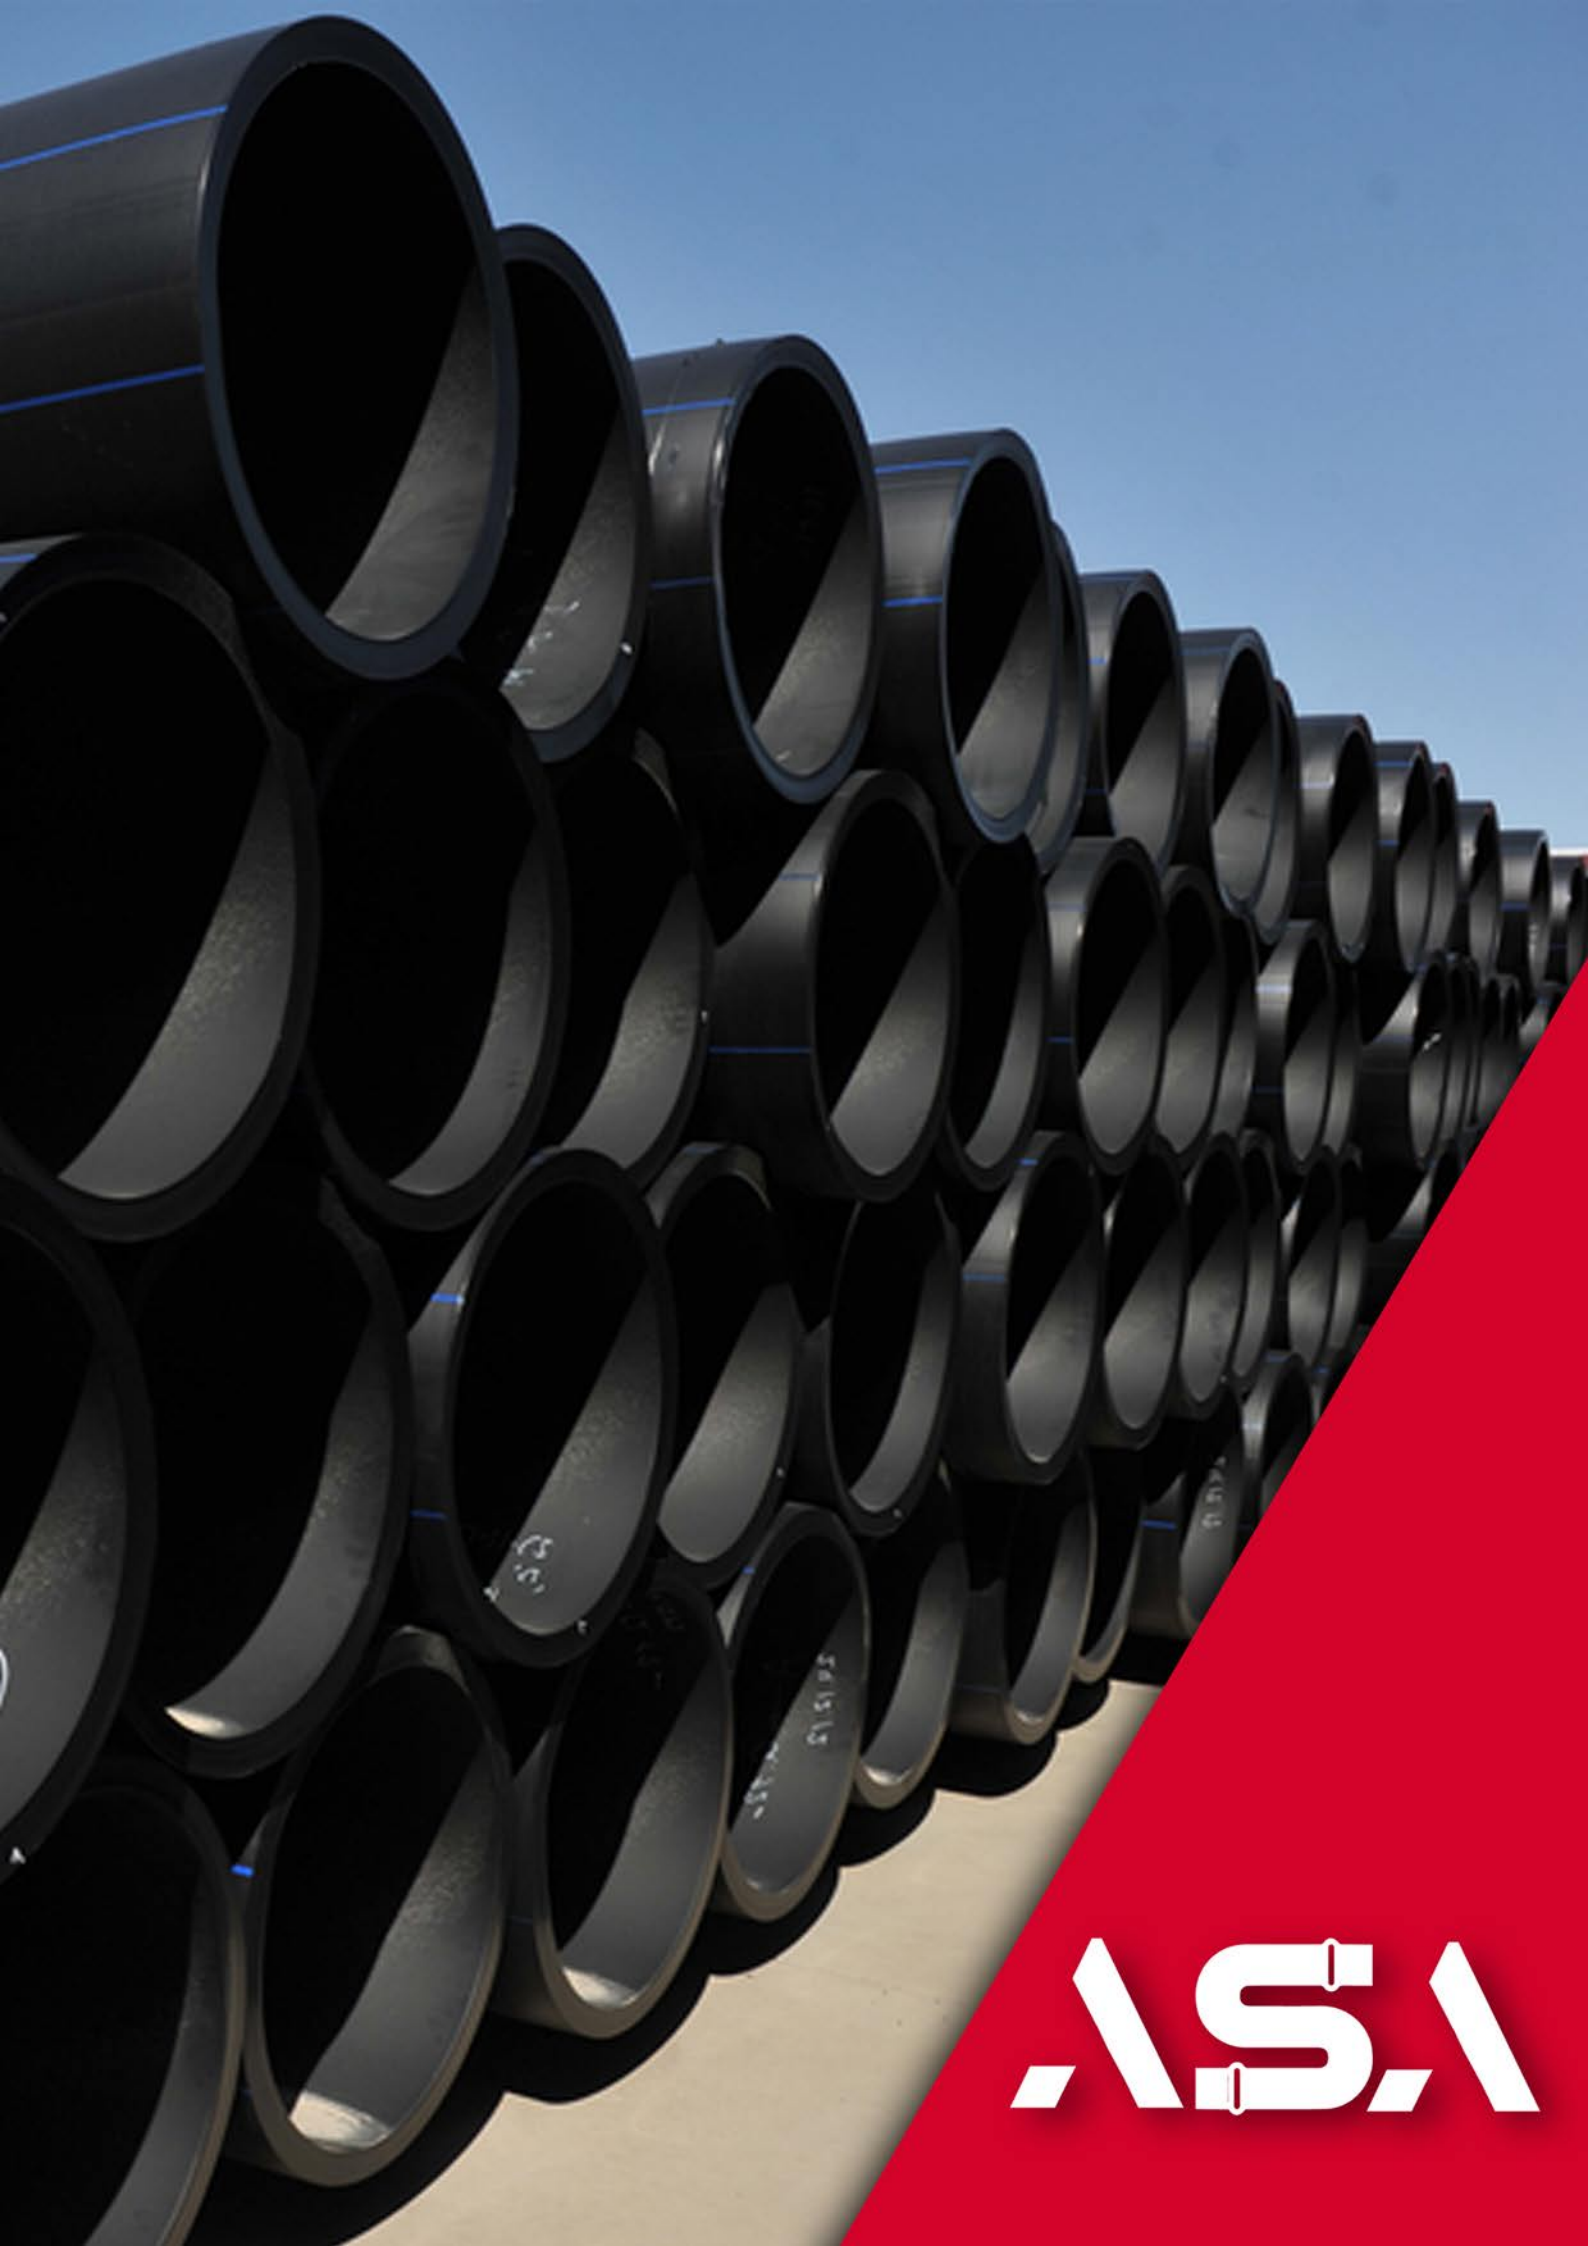

ASA

Polyethylene pipe benefits:

1. Low weight and easy installation
2. Resistance against corrosion
3. High length of polyethylene pipes will reduce use of joints, so it will reduce the chance of joints leaking
4. Liquids will flow in them easily because there it has no coarseness
5. Easy to weld
6. Ability to Cause bending in pipe without needing any joints, because of its high flexibility
7. No need of any special equipment to install

ASVA

Services

1. Free consultation to purchase products and quality and other information
2. Possibility of immediate sending to all parts of Iran and export to other countries without any restrictions.
3. According to the contract, it is one of our obligations and we will not spare any effort in this way to satisfy our customers.

ASA

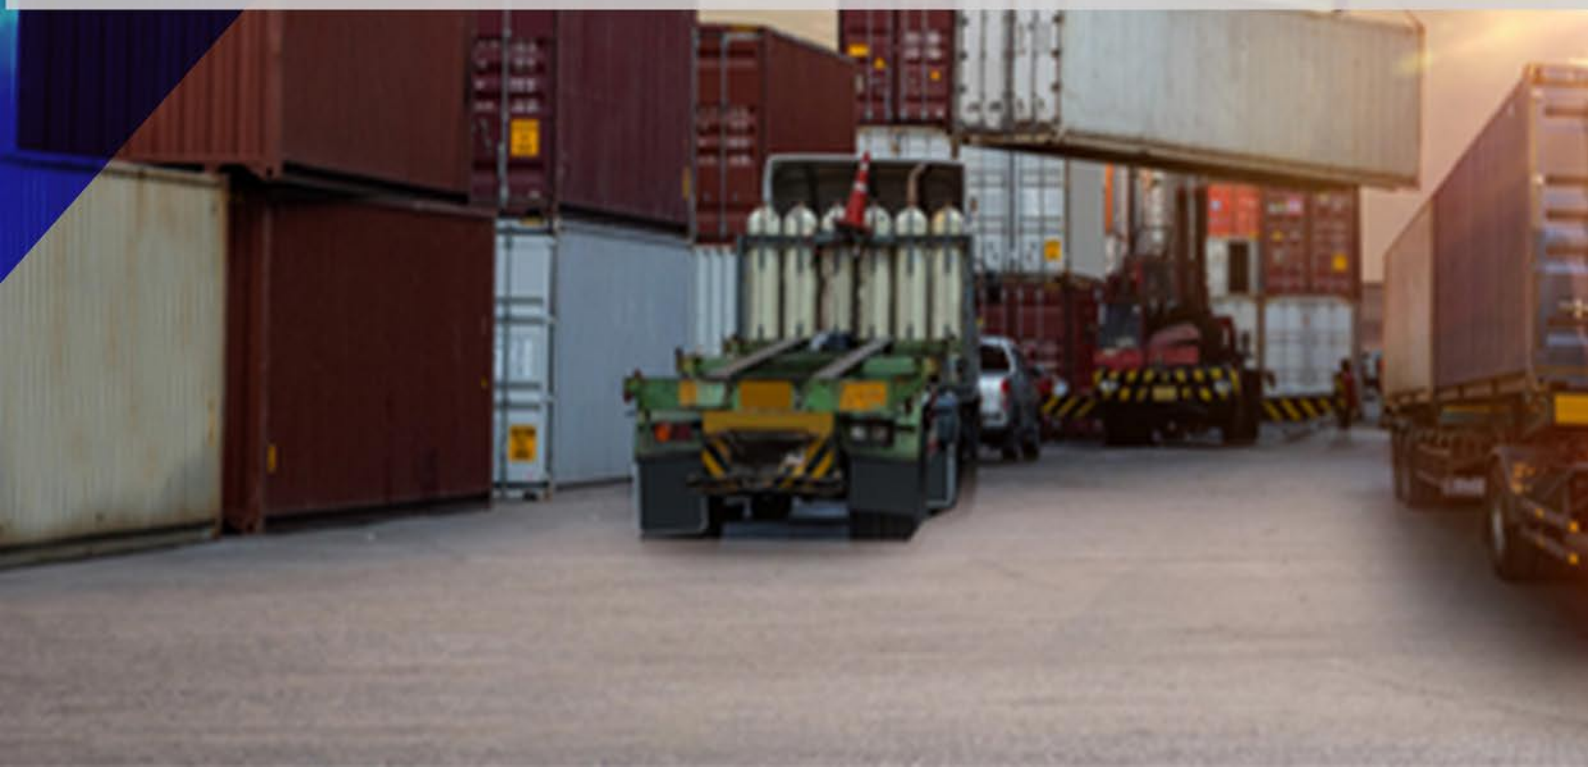

Product delivery

Iran has several sea, air and land borders. Due to the volume of orders, priority is given to sending products through land and sea borders. Of course, according to the final destination, our experts will consider the best method and route for the delivery of goods, so according to the volume of the order, the method of sending and delivering cargo may have some changes.

Therefore, the company's priority for exchanging goods by sea is CIF, FOB methods and exporting goods through land borders, FCA and EXW methods. Also, share the method of delivery of your goods with us so that the result will be announced to you after reviewing.

Payment methods

Due to having multiple foreign currency accounts in the names of different companies and individuals, we suggest you the cash deposit method. If you have another method for your payment, inform the relevant expert.
